	Salt	.05
	Total (as fed)	28.78

Note: These rations are examples only using standard book values. Forages of the same type can vary greatly from field to field, by region and from year to year. Your roughages should be analyzed and a ration specific to your feeding program (stage of gestation, type and moisture of your feed ingredients, size and body condition of your cows, etc.) be developed by a nutritionist or your veterinarian.
